Collaboration

## PROFILE

Hi there! My name is Sam. I'm a recent graduate of Design Computing at the University of Sydney. During my degree, I discovered a passion for creating enjoyable and meaningful experiences that become part of people's everyday lives. My passion is wellbeing and learning design. I enjoy working in this space with teams comprised of individuals with unique perspectives and a like-minded goal to bring about innovation.

## EXPERIENCE

**ASSOCIATE TECHNOLOGY CONSULTANT** Jun 2018 - Present  
ACCENTURE TECHNOLOGY

As a technology consultant, I've found the keys for success to be an understanding of stakeholder needs and pain points as well as their effective communication, the utilization and collation of subject matter expertise from various experts and building a strategic framework around the software development lifecycle. I've found that through the efficient and effective implementation of these concepts, a relationship of trust and success is built between a technology consultant and their client.

**WEB DESIGN DEMONSTRATOR** Jun 2017 - Jun 2018  
THE UNIVERSITY OF SYDNEY

As a demonstrator, I have learnt to quickly grasp how to speak to large groups in an energetic and educational way. In contrast, I would also speak to students one on one; covering content in a more conversational way. Honing these styles of communication has helped me to better read a room and understand the priorities when conveying understanding.

**SALES REPRESENTATIVE** Jun 2016 - Dec 2016  
LANGTONS WINE BROKERAGE

As a sales specialist, I learnt the fundamentals of a sales pitch. It was enjoyable working for a company that really invested in the customer. I learnt to quickly comprehend the customer's needs; both conscious and subconscious. I could then give them easy to understand information about the product that suited them. This took the hassle of the overabundance of choice out of their experience.

**ROWING COACH** Nov 2014 - Mar 2016  
NEWCASTLE GRAMMAR SCHOOL

As a rowing coach at Newcastle Grammar School, I taught young people to work as a team and develop physical and mental fitness. The most important takeaway from my time coaching was learning how to motivate people in time sensitive situations.

## EDUCATION

**BACHELOR OF DESIGN COMPUTING** Mar 2015 - Mar 2018  
THE UNIVERSITY OF SYDNEY

This degree has fostered my passion to create enjoyable and meaningful experiences. I've realised UX Design is a path to create something that can change people's lives for the better. The skills I've learnt have allowed me to transform my goals into actionable steps to more efficiently and effectively create a change for the better.
